PROFESSIONAL SUMMARY

Graduate student in Applied Computer Science with hands-on experience in software development, data analysis, and machine learning. Skilled in Python, Java, SQL, scikit-learn, PyTorch, and data visualization, with a strong foundation in algorithms, object-oriented design, and database management. A quick learner with strong analytical, debugging, and implementation skills, seeking opportunities in software engineering, data analyst roles, machine-learning positions, and other data-centric fields.

TECHNICAL SKILLS

Languages:	Python, SQL, Java
Frameworks & Tools:	Spring Boot, React.js, Excel, Power BI, Tableau, scikit-learn, PyTorch, TensorFlow, scikit-fuzzy, Matplotlib, Seaborn, Jupyter Notebook, VS Code, PyCharm, Git/GitHub
AI & Machine Learning:	Predictive modeling, classification, regression, clustering, data cleaning, model evaluation, Generative AI, Retrieval-Augmented Generation (RAG), embeddings, semantic search, prompt engineering.
Databases & Automation:	MySQL, PostgreSQL, MySQL Workbench, ETL workflows,
Professional & Technical Skills:	Algorithms, Data Structures, OOP, debugging, optimization, Computer-Science Fundamentals, API integration

EXPERIENCE

TSYS School of Computer Science, Columbus State University Columbus, GA (Oct 2024 – May 2026)
Graduate Administrative Assistant

- Provided administrative and technical support to the Department Chair, including documentation, scheduling, and coordination of academic activities.
- Supported event planning and execution for Coding Carnival, STEM outreach programs, and departmental initiatives.
- Maintained accurate records and ensured smooth workflow across departmental operations.

Go Digit Pvt Ltd Bangalore, India (Jul 2023 – Mar 2024)
Trainee Developer

- Developed and maintained backend API components to support enterprise web applications.
- Implemented and maintained CORS filters to enable secure cross-origin communication.
- Integrated Keycloak for user authentication and access management in backend services.
- Collaborated with team members to ensure seamless integration of frontend and backend systems.
- Prepared documentation and presentations using Microsoft Office for weekly project updates.

EDUCATION

Columbus State University Aug 2024 – May 2026
MS, Applied Computer Science – AI and Data Science (GPA: 4.0/4.0) Columbus, GA

- **Coursework:** Algorithms Analysis, Object-Oriented Development, Applied Machine Learning, Data Science and Big Data Analytics, Deep Learning, Intelligent Systems, Data Visualization

- **Coursework:** Data Structures, Algorithms, Operating Systems, Computer Networks, Database Systems

PROJECTS

Credit Card Fraud Detection Using Random Forest

- Addressed imbalanced datasets with techniques like SMOTE and trained a Random Forest classifier.
- Compared performance with Logistic Regression and SVM using precision, recall, and F1-score

Stock Price Prediction Using LSTM Neural Networks

- Built an LSTM-based predictive model to analyze short-term stock trends using historical data.

EcoSense: Air Quality Prediction

- Collaborated with an Egyptian team to implement Naïve Bayes and fuzzy decision tree approaches for air quality prediction and categorization.

VOLUNTEERING & ACTIVITIES

- Event support and coordination for Girls Who Code, Georgia STEM Day (2025 and 2026), YCC Expo, and Aflac CyberInspire 2026.
- Assisted faculty in organizing technical workshops and student engagement events.
- Supported academic outreach initiatives at the TSYS School of Computer Science.
